

Now the experience I have had in the culture of Fiax has given me I think, a thorough knowledge of the mode of treatment May 1, 1851—n30w2 S1 00 to be given to that crop in order to get the largest amount of yield from the land. The depends an circumstances. Land in a good attree for Flax will always pay, whilst land in a overdone condition can never pay.

The fineness or coarseness of Flax dupends on the quantity of seed sown to the acre. It sown thin a long coarse crop will ere. It sown thin a long coarse crop will

tenth less than of fine seed. Therefore the farmer must take these things into consideration. No crop requires more attention and none will pay better if rightly treated, but to do this the farmer must be experienced and to find experience he must apply cannot find any, let him go by the best of his knowledge and every year will increase to us that this is a great time of need, as all are a sequented with our misfortune. "A word to the his skill in the matter. Flax requires was his skill in the matter. Plax requires watering from the time it is sown to the time April 17, 1851—n28tf.

the Plaxseed ripens, others must be pulled soon after the seed bulls have shaped on the stalks (unless seed be the object) I have often seen the very best crops of Plax. from a lack of knowledge on the part of the owner, turn out hardly enough to pay costs, whilst an experienced man can profit more by the very poorest crop of Flax than any other crop he can sow.

But many of your countrymen complain that their land is not suited for Flax. Now this I say to such, I know of no other grop better suited to all kinds of soil. There is however some land that will disease Flax, but none I think that will not pay better there it in the quality of drugs and ascertain of the prices.

Being a practical Tailor, and having been carrying on the business for seven years in Pomeroy, I have rejected my stock with a full knowledge of the wants of this market—looking to substantial goods and cheap prices.

My stock consists of Dress, Prock and Sack Coats, Pantaloons, Vesta, Shirts, Undershirts, Drawers, Furnishing Goods, Cravats, Caps, Tranks &c. Also, a superior article of Tailor's Sheam and Points; an article kept nowhere else in Pomeroy.

The undersigned does not feel it necessary to boast of the great variety and cheapness of his stock. He knows that an examination of his goods will tell more potently in their favor than all the 'high-faluting' words to be found in Walker and Webster, could say for them. He therefore leaves it for others, whose stock needs to be praised, to tell about the variety, goodness, and cheapness of their goods. His goods speak for themselves, as all competent judges must decide.

Wistar's Balsam of Wild Cherry. The Great Remedy for Consumption of the Lungs Affections of the Liver, Asthma, Bronchitis Pains or Weakness of the Breast or Lungs, and other affections of the Pulmonary Organs,

is a fine herbal medicine, composed chiefly of Wild Cherry bark and the genuine leeland Moss, (the latter imported expressly for this purpose,) the rare medical airtues of which are also combined by a new chemical process, with the extract of tar—thus rendering the whole compound the most certain and efficacious remedies discovered for Consumption of the Lungs.

INTERISTING CORRESPONDENCE.—Dr. William Y. Banks, of Xenia, Ohio, a highly respectable druggist in that delightful village, has informed us that the sale of Wistar's Balsam of Wild Cherry is unparalleled. The demand for it is so cager, that he can scarcely keep himself supplied with it.—He has had in his store medicines for lung affections. Some of these were esteemed good, and some gave temporary relief. ENTIRALY AND PERMANENTLY OURED, when all hope of relief had been given up, and every thing else been tried in vain!

To illustrate the use of the GALVANIC BELT, suppose the case of a person afflicted with that bane of civilization, DYSPE/SIA, or any other Chronic or Nervous Bloorder. In ordinary cases, rimulants are taken, which, by their action on the nerves and muscles of the stomech afford temperary re lief, but which leaves the pattent in a fower state, and with in jured faculties, after the action thus excited has ceased. Now compare this with the effect resulting from the application of the GALVANIC BELT. Also a Dyseptic sufferer, even is the worse symptoms of an attack, and simply the the Belt around the body, using the Magnetic Field as directed. In a short period the insensible perspiration will act on the positive element of the Belt, thereby causing a Galvanic circulation which will pass on to the negative, and thone back again to the positive, thus keeping up a continuous Galvanic circulation throughout the system. Thus the most severe cases of DYSPEPSIA are PERMANENTLY CURED. A FEW DAYS IS OFTEN AMPLY SUFFICIENT TO FRADICATE THE DISEASE OF YEARS.
